## INTEGRATED TRAVEL MEASURING SYSTEM

- » MEASURING OF STUD TRAVEL (LIFT, PISTON RUNTIME AND IMMERSION DEPTH)
- » MEASURED VALUES ARE SHOWN IN THE DISPLAY OF THE STUD WELDING UNIT\*

### ADVANTAGES

- » very easy adjustment and checking of lift
- » A correctly adjusted lift is a key factor for a high-quality stud weld.  
→ As the adjusted lift is shown in the display of the unit time-consuming manual measuring is no longer necessary.

### MONITORING OF WELDING QUALITY

- » Comparison of actual values to set values for each weld  
→ in case of variances a warning is displayed or the unit is locked for further welds
- » storage of the last ten welding parameter sets in the stud welding unit optional: welding parameter memory for 24500 welding parameter sets

\*Only in connection with series PRO-I, PRO-D and PRO-C units.
